

Safety Protocols

What screening will be done each day?

Upon arrival all campers will have their temperature checked, wash their hands with hand sanitizer and parents will need to answer three health screening questions.

Will campers, students or staff be required to wear a mask?

Yes masks are required for everyone in the facility at all times.

Will there be any breaks from wearing masks throughout the day?

Yes. We will schedule a few mask breaks throughout the day. These will be done when greater physical distancing between campers is possible or when we are outdoors.

What social distancing measures will you have in place?

During open gym, sports activities, and Taekwondo training all children will be kept six or more feet apart. During digital learning and lunch/snack times all desks will be placed six or more feet apart.

Will students be allowed to use the water fountain?

No, students will be asked to bring their own water bottle. Staff will assist children in refilling their water bottles as needed.

What is the camp sick policy?

Students should not attend camp if they are not feeling well. Campers may be sent home upon arrival, or at any point in the day, if the camp staff recognize any signs of illness. These signs include, but are not limited to coughing, sneezing, or complaints of a sore throat or headache. In addition, any campers who have travelled outside of NYS to an area requiring quarantine upon return, must wait 14 days before returning to camp. The same applies to any camper who has come in contact with someone diagnosed with COVID -19.

What happens if a camper is diagnosed with COVID-19?

We will be following the same policy as many local school districts. In the event that a camper is diagnosed with COVID-19 we will notify and collaborate with the Erie County Department of Health and contact the families of individuals who were in close contact with that camper and provide instructions regarding quarantining and testing.
